

## ThermaPod

*The solution to lunch boxes and food ware*

---

---

## Sustainability & the Environment

- **Eco-Friendly** – Reduced packaging waste, improved quality and long-term product durability ensures less packaging materials are required.
- **One piece design**, ensures no lost lids or compartments – reduced landfill.
- **Advanced eco-friendly materials** – The materials have been formulated to minimize the environmental impacts while optimizing thermal performance of the product.
- **Fact:** According to the New York State Department of Conservation, parents who pack a child's lunch in disposable bags or containers generate 45 to 90 pounds of garbage every year. That equates to almost 19,000 pounds of lunch waste for just one average-size elementary school each year.

*Fact: "Lunchtime trash is second only to office paper as the leading source of school waste..." (Green Teacher Magazine, Fall '04)*

### Nutrition & Healthy Eating

- **Portion Control** – Developed in conjunction with Canada’s health food guide for proper portion size and nutrition.
- **Improved eating habits** - The likelihood of your child eating a more balanced meal when presented with all of the items at once is greatly increased. This reduces the percentage of waste for untouched food items as typically packaged with “conventional containers”.
- **Fact:** Home made lunches are not only more nutritious than prepackaged lunches, but they tend to cost less as well.
- **Compartment tray design** encourages healthier food and portion size.

### Convenience, Ease of Use

- **Simple to use easy to clean** - dishwasher, microwave and freezer safe and easily stackable
- **Only FDA approved** materials used in the manufacturing of the product
- **Wash and Dry** design to ensure optimal hygiene
- **Stylish & Slick** – The ThermaPod comes in different colors with an ultra modern laptop look. Adults and children love
